Introduction

The 1979 statistical yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every futures contract traded on the Exchange during 1979.

The yearbook begins with a trading summary for 1979 and is then divided into six main sections, one each for gold, silver, copper, zinc, 90-day Treasury Bills, and GNMA certificates. Each section includes opening prices, high and low prices, closing and settlement prices, volume, open interest, stocks, and deliveries for every COMEX trading day. Additional tables on related U.S. producer and dealer prices, European producer prices, and London gold and silver fixings are also listed.

We know this yearbook will prove to be a valuable source for commercial and speculative users of futures markets and to students of commodities trading. Additional copies are available from the Commodity Exchange, Inc., 4 World Trade Center, New York, N.Y. 10048 (212) 938-2900.

1979 Trading Summary

Gold COMEX gold futures became the most actively traded domestic metals futures contract in 1979, and ranked fourth among all commodity futures contracts traded in the United States.

Interest in gold futures grew at an impressive rate as the volatility of spot month gold prices on COMEX increased during 1979, ranging from a low of $215.50 per troy ounce in January to a high of $534.50 in December. A record 6,541,893 contracts were traded, a 75% increase above the 3,742,378 contracts traded in 1978.

A new monthly trading record was set in December 1979 as 714,485 contracts were traded. The growth of open interest during the course of the year was also impressive. From a level of 186,212 contracts open at the end of 1978, open interest increased to 248,105 by the end of 1979.

Silver Silver, like gold, reached unprecedented price levels during 1979. Silver futures prices ranged from a low of $5.9310 per troy ounce on January 12 to a high of $35.00 on December 31. A new record annual volume was established as 4,080,619 contracts were traded, an increase of 6.8% over the 1978 volume of 3,822,085 contracts. COMEX silver was the fifth most active futures contract traded in the U.S. in 1979, and continued to attract a broad range of industry and public traders.

Late in the year, through the efforts of the economics division and the Control Committee, the Board of Governors was alerted to an apparent concentration of large positions under the control of a limited number of traders. Recognizing the need for the silver market to be closely monitored by an unbiased group, the Board of Governors appointed a Special Silver Committee composed of four Board members who were impartial to the market. This Committee, chaired by Dr. Andrew F. Brimmer, who was also the Chairman of the Control Committee, was charged with the responsibility of investigating and monitoring silver market conditions.

At year end, the Special Silver Committee was actively involved in its study of the silver market. The Committee, under the authority granted to it by the Board of Governors, had increased silver margins on all contracts to reflect the high volatility of silver prices. In addition, margins for the spot month were raised significantly to insure that all parties involved in deliveries had the financial capacity to meet their contract obligations.

As a result of the actions of the Special Silver Committee, Control Committee and members of the staff, the COMEX Silver Contract closed out 1979 in an orderly manner.

Copper Copper prices fluctuated over a wide range in 1979 from a low of $.68 to a high of $1.17 for the spot delivery month. Many of the nation's primary copper producers continued to base their sales of this important industrial metal on the prices established at the COMEX copper trading ring. Other producers who continue to sell their output on the basis of published prices had to frequently adjust these prices in order to be competitive with the firms who were utilizing a COMEX-based pricing system. These events attest to the importance of COMEX as the focal point of price discovery in the copper industry.

Trading activity in COMEX copper futures increased substantially during 1979. A total of 2,301,033 contracts were traded, an increase of 63% over the 1,408,688 contracts traded during 1978. The COMEX copper contract ranked as the 11th most actively traded U.S. futures contract this year, a move from the 13th position last year.

A new single day record volume was set on March 2, when 18,887 contracts were traded. Weekly volume also reached a new record level during the week ending April 20, when 71,392 contracts changed hands. Open interest climbed to a new high of 66,697 contracts on December 21. At year end, open interest stood at 64,363 contracts, an increase of 9,076 contracts over the 1978 year end figure of 55,287 contracts.

On April 30, 1979, an amendment to the COMEX By-Laws and Rules became effective which required all licensed copper warehouses to obtain all-risk insurance against the loss of copper. These By-Laws insure against the loss of or damage to copper stored in the various warehouses. The prime beneficiaries of this program are the copper warehouse receipt holders, although the policies are carried by the licensed warehouses. This was the first program of its kind to be sponsored by the U.S. commodities exchange.

During a period when copper prices were increasing dramatically, the Exchange's market surveillance staff, under the direction of the Control Committee, paid particular attention to the adequacy of the amount of copper stored in licensed COMEX warehouses when compared to the size of the open interest in expiring delivery months. This continual scrutiny provided the Board of Governors with the information it needed to deal with the changing nature of the market.

During November, the Board of Governors determined that there were a large a number of open copper contracts for December delivery in comparison to the deliverable supply of the metal. In response, the Board passed an emergency rule which limited trading in the December contract to liquidation only, thereby precluding any market participants from increasing their positions to a level which would cause difficulties in effecting deliveries. This action permitted the December copper contract to liquidate in an orderly manner. Such prompt and effective action by the COMEX Board of Governors demonstrates the Exchange's awareness of the dynamics of its markets and its ability to fulfill its self-regulatory responsibilities.

Zinc Trading of Zinc futures was limited during the year with only 75 contracts changing hands. The Exchange believes that this contract could be advantageously utilized by the zinc industry and remains hopeful that trading volume will be increased during the year ahead.

90-Day U.S. Treasury Bills Trading in futures contracts for the delivery of 90-Day U.S. Treasury Bills was initiated on COMEX on October 2. Less than a week later, the Federal Reserve Board announced changes in the manner in which it would conduct its monetary policy in order to deal with the domestic inflation problem. This action had a considerable impact on the financial community, which reacted by reducing daily activities in government debt obligations. Nevertheless, the COMEX T-Bill contract began trading very successfully.

During October, the average daily volume of trading in 90-Day U.S. Treasury Bills exceeded 400 contracts. By December 7, open interest had reached its high of 1,252 contracts and on December 31, open interest stood at 913 contracts.

In the midst of the high level of uncertainty surrounding interest rates and the resulting high degree of volatility in the value of interest bearing securities, the COMEX T-Bill contract had an auspicious beginning. The contract benefitted from the support of the diverse interests of the membership as the floor members and permit holders made markets in this contract so that commission house and trade house orders could be executed.

GNMA Certificates Futures trading in mortgage-backed certificates guaranteed by the Government National Mortgage Assciation ("GNMA") began on November 13. GNMA certificate futures trading was affected by the condition of the cash market as long-term interest rates became highly volatile. In addition, the liquidity previously enjoyed in the GNMA secondary market declined, as a number of cash and forward market-makers decreased their market involvement.

At the ceremonies marking the opening of the COMEX GNMA certificate contract, Mr. Warren Lasko, Vice President of the Government National Mortgage Association, made the following comments: "The growth of futures markets for the trading of GNMA securities is the most important development in this dynamic market to take place in recent years. At a time of turbulent changes in the securities markets, the conduct of trading for future delivery in a formal and regulated trading environment introduces elements of stability and financial soundness that do not exist and perhaps can never be achieved in the unregulated over-the-counter forward trading markets."

During the seven weeks that the COMEX GNMA contract was traded in 1979, 873 contracts were traded. Open interest in this contract stood at 64 on December 31. COMEX is poised to provide a liquid marketplace for GNMA certificate futures contracts in 1980 and the years ahead.

Contract Specifications

	GOLD	SILVER
Trading Unit	100 troy ounces	5,000 troy ounces
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. During any one market day, price fluctuations are limited to twenty-five dollars ($25) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. During any one market day, price fluctuations are limited to fifty cents (50¢) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:25 AM to 2:30 PM New York Time	9:40 AM to 2:15 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any February, April, June, August, October and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	GC	SI
Deliverable Grades and Contract Size	100 troy ounces (five percent more or less) of refined gold, assaying not less than 995 fineness, cast either in one bar, or in three one-kilogram bars and bearing a serial number and stamp of a refiner approved and listed by COMEX.	5,000 troy ounces (six percent more or less) of refined silver, assaying not less than 999 fineness, in bars cast in weights of 1,000 or 1,100 troy ounces and bearing a brand approved and listed by COMEX.

	COPPER	ZINC
Trading Unit	25,000 pounds	60,000 pounds
Price Multiples and Fluctuations	Price changes are registered in multiples of five-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of five-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to three cents (3¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:50 AM to 2:00 PM New York Time	9:15 AM to 2:15 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 14-month period beginning with the current calendar month.
Trading Symbol	CU	ZN
Deliverable Grades and Contract Size	25,000 pounds (two percent more or less) of electrolytic, lake, or certain types of fire-refined copper. The basis grade is electrolytic copper cathodes. Fire-refined high conductivity copper and lake copper are deliverable at the contract (basis) price. Depending on the particular refinery shape, electrolytic copper is deliverable at a premium of 5/8¢ or 1/4¢ per pound above the contract price. Fire-refined copper is deliverable at a discount of 1/8¢ per pound below the contract price. All deliverable copper must conform to specifications established by the American Society for Testing and Materials for the particular shape and grade involved and be of a brand approved and listed by COMEX.	60,000 pounds (one-half percent more or less) of Special High Grade or High Grade zinc. The basis deliverable grade is Special High Grade slabs. Slabs must be of usual commercial sizes and not more than 60 pounds nor less than 40 pounds per slab. High Grade zinc is deliverable at a discount of one-half of a cent (1/2¢) per pound below the contract price. All deliverable zinc must conform to specifications established by the American Society for Testing and Materials for the particular grade involved and be of a brand approved and listed by COMEX.

Contract Specifications continued

	GNMA	90-DAY T-BILLS
Specifications	8% GNMA modified pass-through single-family mortgage-backed certificates having $100,000 remaining principal balance assuming a 30-year mortgage with a 12-year life.	U.S. Treasury Bills having $1,000,000 face value at maturity and 90 days to maturity from the delivery date of each contract.
Price Multiples and Fluctuations	Prices are quoted as a percentage of par in increments of 1/64th ($15.62 per contract). During any one market day, price fluctuations for any traded month are limited to 64/64ths (equivalent to 1% of par or $1,000 per contract) above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded price limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of .01 of the Standard Index, equivalent to $25 per contract. During any one market day, price fluctuations for any traded month are limited to .60 of the Standard Index ($1,500 per contract) above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded price limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:00 AM to 3:20 PM New York Time	9:05 AM to 3:30 PM New York Time
Termination of Trading	Trading will cease in the current delivery month at 12:00 noon (New York time) on the 7th last business day of the month.	Trading will cease in a scheduled delivery month at 12:00 noon (New York time) on the second business day following the 90-Day Treasury Bill auction of the third week of such month.
Trading Months	Trading is conducted for delivery in the current calendar month, the following two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, April, July and October falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in any February, May, August and November falling within a 23-month period beginning with the current calendar month.
Trading Symbol	GI	TQ
Deliveries	Each delivery is made by the transfer of 8% GNMA certificates having $100,000 (±2.499999%) remaining principal balance or their equivalent. Deliveries may be effected with coupons other than 8% on a yield equivalency basis calculated at the final settlement price of the contract, assuming a 30-year mortgage with a 12-year life. No deliveries may be effected using a GNMA certificates with a coupon rate higher than the coupon rate of GNMA certificates being produced at the time of delivery, nor lower than 1% less than the lesser of 8% or the current production rate of GNMA certificates. Certificates which bear a coupon rate which was produced during the 90-day period preceding a delivery date are not subject to the foregoing rate limitations. Deliveries relating to other than multiples of ten contracts must be effected with certificates from one mortgage pool. Each delivery in satisfaction of 10 contracts may be made using two pools.	At the seller's option, Treasury Bills with 90, 91 or 92 days to maturity may be delivered. All Bills in a delivery unit must bear the same maturity date.

KEY TO ABBREVIATIONS

Opening Futures Prices

@: Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "@" is the prevailing bid in the market during the opening period while the price following the "@" represents the prevailing offer. If there is no price preceding or following the "@," there was either no bid or offer during the opening call, respectively.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T" indicating the direction in which the market moved during the opening period.
